

Brainstorming & Idea Prioritization

Date	15 September 2026
Team ID	SWTID-2026-2825
Project Name	AI WeatherWise
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member listed ideas independently during the kickoff session on 15 September 2026, before grouping and rating them.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Safiyah Arif	An AI-powered platform that lets users save favorite cities and get natural-language weather summaries instead of raw numbers	Weather + Generative AI	1
2	Safiyah Arif	Secure, JWT-protected accounts so weather preferences sync across devices	Backend / Security	1
3	Kelwin Benjamin A	Smart outfit & activity recommender based on live weather conditions	AI Recommendation	1
4	Clement Anthony Martin	Multi-city weather comparison tool for frequent travellers	Weather / Backend	2
5	Firos Shah A M	Use Google Gemini to turn raw OpenWeatherMap metrics into a personalized, conversational summary	Generative AI	1
6	Kelwin Benjamin A	Community weather-alert sharing between friends and family	Social / Alerts	2

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Priority	Selected (Yes/No)
1	AI WeatherWise - secure backend platform that manages favorite locations and turns live weather data into AI-generated summaries and recommendations via Google Gemini	High	High	High	Yes
2	Multi-city comparison and community alert-sharing module	Medium	Medium	Medium	No - deferred to future roadmap (see Scalability & Future Plan)

Group 1 was selected as the team's final idea for the 15-29 September 2026 build cycle because it directly combined the team's strongest skills (Node.js/Express backend, MongoDB, and Generative AI integration) with a clear, demonstrable user problem.
