Customer Journey Map

Mapped for Alex's end-to-end journey through AI WeatherWise, from account setup to receiving an AI-driven recommendation.

Phase of Journey	Stage 1: Account & City Setup	Stage 2: Weather Retrieval	Stage 3: AI Insight & Action
Actions What does the customer do?	Registers/logs in; adds favorite cities via the Location API; confirms saved city list	Requests current weather for a saved city; reviews temperature, humidity, wind & condition	Requests an AI-generated summary/recommendation; reads the advice; plans his day/trip
Touchpoint What part of the service do they interact with?	POST /api/auth/register , POST /api/auth/login , POST /api/location	GET /api/weather/:city (OpenWeatherMap integration)	POST /api/ai/insights (Google Gemini integration)
Customer Thought What is the customer thinking?	"I hope my login and saved cities stay secure and available next time."	"Is this data accurate and current?"	"This actually tells me what to do, not just numbers."
Customer Feeling What is the customer feeling?	Cautiously optimistic	Informed but neutral	Confident and reassured
Process Ownership Who is in the lead on this?	Auth & Location Controllers – Safiyah Arif, Kelwin Benjamin A	Weather Controller / Weather Service – Clement Anthony Martin	AI Controller / AI Service – Firos Shah A M
Opportunities How can we improve this stage?	Add social login (Google OAuth) to reduce sign-up friction	Cache frequent city look-ups to cut external API latency	Let users rate AI recommendations to refine future prompts
