

No. of Functional Features Included in the Solution

Date	27 September 2026
Team ID	SWTID-2026-2825
Project Name	AI WeatherWise
Maximum Marks	5 Marks

Functional Features Overview

S.No	Feature Name	Feature Description	Module / Component	Status
1	User Registration	Create an account with name/email/password (bcrypt-hashed)	authController.js / User.js	Done
2	User Login (JWT)	Authenticate credentials and issue a JWT access token	authController.js	Done
3	Auth Middleware	Verify the JWT and protect private routes	authMiddleware.js	Done
4	Add Favorite Location	Save a city + country to the logged-in user's profile	locationController.js / Location.js	Done
5	Manage Favorite Locations	View, update and delete saved locations	locationController.js	Done
6	Real-Time Weather Fetch	Retrieve live weather metrics for a saved or queried city	weatherController.js / weatherService.js	Done
7	AI Weather Summary	Natural-language summary of current conditions via Gemini	aiController.js / aiService.js	Done
8	AI Recommendation Engine	Personalized activity/clothing suggestions based on live weather	aiController.js / aiService.js	Done

Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6 (Registration, Login, Auth Middleware, Add/Manage Location, Weather Fetch)
Additional / Nice-to-Have Features	2 (AI Weather Summary, AI Recommendation Engine)
Features Tested & Verified	8 of 8, verified via Thunder Client, 22-27 September 2026

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	0	None - headless REST API, consumed via API clients by design
2	Backend / Logic	6	Auth, Location, Weather and AI controllers & services
3	Database / Storage	2	User.js and Location.js Mongoose models
4	API / Integration	2	OpenWeatherMap API, Google Gemini AI (@google/genai)
5	Security / Authentication	2	JWT authentication, bcrypt password hashing
